

CPR 7 Step Action Plan

D	Danger Check the area. Ensure it is safe for you, the bystanders, and the patient.
R	Response Check for a response by firmly squeezing the shoulders and saying... “Can you hear me?” “Open your eyes” “Squeeze my hand.”
S	Send for Help Call the local emergency service in your country. 112 is the international standard emergency number. Send a bystander to get an AED.
A	Airway Open the mouth and check for obstructions. If clear, use a head tilt/chin lift to open the airway.
B	Breathing Look, Listen, and Feel for no more than 10 seconds. If breathing is absent or abnormal (gasping), move to CPR. If breathing normally roll on to side.
C	CPR Give 30 chest compressions followed by 2 breaths . Aim for a rate of 100–120 compressions per minute. Continue CPR until help arrives /breathing normally.
D	Defibrillation Turn on the AED as soon as it arrives. Follow the voice prompts immediately.

- Chest compressions are performed in the centre of the chest for women and men
- Do not hesitate due to breasts or clothing
- You may need to remove clothing and touch the chest to ensure correct hand placement

- Do not delay using an AED
- Remove clothing and bra if needed to ensure correct pad placement
- Place pads as directed
- You may need to move or lift the breast to ensure correct pad placement
